

Key Decisions in U.S. History

A Participatory Approach

Volume 1: 1450 - 1860

Volume 2: 1861 - 1994

Reproducible teacher books, 150 pp. each

Grades 6-9; readability, grade 4

Give all students reading at the fourth grade level and higher the skills and schema they need to learn U.S. history. In reliving historical events by actually making decisions that shaped this country's past, students internalize the events and develop a context in which to place historical facts. Each chapter in this two-volume set spotlights a crucial turning point in North American history, couched in terms of a provocative and period-specific question. In deriving the answer, students develop historical understanding by adopting the perspective and emotions of those involved. Activities enhance comprehension, promote critical-thinking and decision-making skills, and foster group discussion. A perfect supplement for any U.S. history text, activities do not assume or require any prior knowledge or study of U.S. history. A total of 228 reproducible student pages is supported by each volume's detailed historical notes, answers to activities, and thematic index. (Patrick Henry Smith and John Croes)
